

NEOCOMP SUITE: SYSTEM MAP

Core Architecture & High-Level Module Interactions

Scope: All Modules & Workflows
Enterprise Reference Blueprint

1. HIGH-LEVEL ENTERPRISE DATA FLOW ARCHITECTURE

3. COMMERCIAL PROCESS FLOWCHART

4. SUPPORT SERVICES (CSM) WORKFLOW

1. Ticket Intake: Cases logged with Priority (SLAs applied), linked Product, Serial No, and Invoice.
2. Entitlement: Auto-verifies serial number coverage status (Active Warranty / AMC contract). Out-of-contract flagged.
3. Service Visits: Dispatches field engineers. Check-In & Check-Out capture real-time timestamps and GPS coordinates.
4. Resolution: Service Visit closures require diagnostic reports and sign-offs, updating the ticket state to Resolved.

5. HUMAN RESOURCES & PAYROLL RUNS

Payroll Batches

- Creates monthly runs based on company structure configuration.
- Calculates base salary, allowances, tax deductions, and net pay.
- Locked runs prompt payment updates and disburse employee payslips.

Letter Templates

- Generates document letters directly from employee structures.
- Supports Offer, Appointment, Promotion, and Relieving letter variations.
- Audit logs record every letter generated with timestamps and admin user IDs.

6. STRATEGIC REVENUE PLANNING

Planning Screen Workspace: Provides planners with tools to formulate annual budgets. Planners can set company-wide targets, perform target simulations, and run reports categorized by SBU, market segments, or status breakdowns. Edit access controls allow changes to previous financial years to maintain historic planning registers.
